EDUCATION

B.Tech in Computer Science and Engineering

Rajiv Gandhi University of Knowledge Technologies, Basar

May. 2024

Pre-University Course

Rajiv Gandhi University of Knowledge Technologies, Basar

2018 - 2020

PROJECTS

Mysterymessage 🌀

Apr 2024

Anonymous Feedback Web Application

Nextjs, Mongodb, typescript, Zod, shadcn, NextAuth, Resend

- Developed a full-stack web application titled "Anonymous Feedback" using Next.js. Integrated custom components from Shad CN UI library and utilized Zod resolvers for data validation.
- Implemented user authentication and authorization using NextAuth.js, incorporating OTP for user verification. Leveraged React Hook Forms for streamlined form handling. Integrated OpenAI API for AI-driven message suggestions.
- This application allows users to create accounts and share profile links for receiving anonymous feedback, displayed in a personalized dashboard.

Summarization App 🌀

Feb. 2024

Document Summarization Application

Flan-5, Nextjs, Acertainty UI

- Designed and implemented a cutting-edge Document Summarization Application as part of a Large Language Model project. Leveraged the state-of-the-art Hugging Face Flan T-5 model to create a robust solution for automatic document summarization.
- LLM Application where users can effortlessly upload PDF documents. Implemented seamless integration with the Hugging Face Flan T-5 model to empower users to generate concise and coherent summaries with a single click.

RIC-Mobile App 🌀

Nov. 2023 - Jan 2024

Read India Celebration Mobile Application

Flutter, Dart, Firebase, Cloud Firestore, Git

- Developed a mobile app using Flutter that converted a website into a native mobile app for Android and iOS. The app featured all of the functionality of the website and was optimized for mobile devices.
- Integrated back-end with Firebase and Cloud Firestore. Features includes Registration page, uploading files, user profile.

SKILLS

Operating Systems: Windows, Ubuntu, MAC
